

The

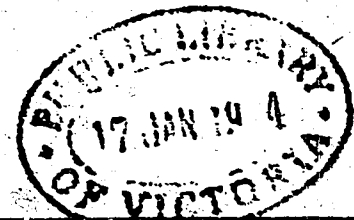

SUN

And LASCELLES and OUYEN ADVOCATE.

Vol. 4. No. 160.

FRIDAY, JANUARY 16, 1914.

Registered at the General Post Office, Melbourne, for Transmission by Post as a Newspaper.

Published every Friday, price 3d.

The Up-to-Date House.

There is no better furnished or more comfortable Provincial House in Victoria than the

COMMERCIAL HOTEL, WOOMELANG.

The Accommodation is Extensive. Single and Double Bedrooms.

Spacious Dining Room and best of attendance, Commercial and Sample Rooms.

Billiard Room--Two Tables.

Gas throughout the Building.

Good Stabling and Yard--Careful and attentive man in charge.

W. J. O'CONNOR, Licensee.

Why Not Buy the Best? Why Not Buy the Best?

The above Illustrates

Jelbart's Patent Air Scavenger Engine.

Why is it that these engines are giving such satisfaction everywhere?

- Ans. 1--Because the Power developed in them is Tremendous.
- Ans. 2--Because in construction the Manufacturers' chief attention is given to Durability, every part being built on the safety factor of twenty-five, i.e., twenty-five times stronger than is considered necessary to resist breakage.
- Ans. 3--Because this Engine has a lower piston-speed, and absolutely fewer wearing parts, than any ordinary oil engine now on the market.
- Ans. 4--When drawn on to the extent of its full power, this engine gives a Power Stroke with Every Revolution, thereby developing an immense increase of power, with comparatively little strain on the working parts.
- Ans. 5--Its economy in fuel consumption is indisputable.

(A) The Scavenging of Cylinder from the expanded gas, with a flushing of fresh air, also contributes to increased power, and at the same time effects considerable saving in fuel. This air scavenger is a feature found in no other engine at present sold in Australia, and in Europe only in very expensive engines, such as are fitted into submarines, torpedo boats, and Dreadnoughts now being built for the several European Navies, and is the only thing yet found capable of displacing steam for this particular purpose.

(B) No Highly Volatile and Inflammable Fuel is needed, No Lamp with dangerous flame is used, consequently No Danger whatever of Fire.

(C) No Valves that are Subject to Heat. The Corrosion and Burning of Valves in other types of engines are Sources of Great Trouble.

(D) The starting of these Engines is easy, and practically instantaneous. The lubrication is automatic.

(E) The Parts are so Few, every part so Strongly Constructed, and the Movement so Smooth and easy as to ensure to this Engine Prolonged Life such as can be claimed for no other make of engine on the Australian Market.

Further particulars, prices, and testimonials from the Makers,

JELBART BROS., 207 Dana-street, Ballarat.

Local Representative, G. S. O'MALLEY.

Watch for further announcement regarding George Munro's New Double-pipe Bagger, Three or Four-knife Chaffcutter. The Best the World Produces.
